

Subject Index to Volume 29

Acetylcholine

- esophageal muscle cell contraction induced by, calcium requirements for, in cats, G330
- in guinea pig gallbladder smooth muscle contraction, G469
- lower esophageal sphincter response to, in cats, G767

Acidosis

- in ileal mucosal tissue: hyperpermeability induced by endotoxin, in pigs, G633

Actins

- gene expression, in intestinal smooth muscle, in trichinosis, G856
- S-thiolation, in cultured gastric mucosal cells, G247

Action potentials

- in opossum esophageal circular muscle cells, effects of sodium nitroprusside on, G1036

Adenosine 3',5'-cyclic monophosphate

- effects on ion transport in rabbit proximal colon, G1071
- and secretagogues regulating somatostatin receptors in chief cells, G789

Adenosinetriphosphatase (ATPase)

- H⁺-K⁺- α -subunit expression, effect of histamine on, G444
- H⁺-K⁺-inhibition by omeprazole, effects on parietal cells, G745

Adenosine triphosphate

- modulation of liver cell ion permeability, G544
- release from hepatocytes, stimulation by adenosine, G99

Adenovirus vector

- for direct in vivo gene transfer to salivary glands, G1146

Affinity labels

- in plasma membrane of canine small intestine circular muscle, G113

Aging

- effect on oral-pharyngeal bolus transit and clearance during swallowing, G972
- and neurotensin expression in ileum, G706

Albumins

- effect on hepatocyte uptake of taurocholate and sulfobromophthalein, G425
- scavenging effect, on oxygen free radical formation by hepatocytes during postanoxic reoxygenation, in rats, G451

Alcohol, ethyl

- effect on plasma membrane order parameter in periportal and perivenular hepatocytes, G282

Alkaline phosphatase

- intestinal and fat feeding, in rat, G944
- intestinal expression during fasting and refeeding, in rats, G83

Amiloride

- effects on ion transport in rabbit proximal colon, G1071

Amylases

- pancreatic, secretion, G363

- pancreatic, secretion: genistein effects on, in rat, G303

Animals, transgenic

- gut epithelial cell differentiation studies in, G987

Anions

- exchange in isolated rabbit parietal cells, G759

Anoxia

- free radical formation and reoxygenation injury in hepatocytes after, G451

Anti-inflammatory agents

- effect of non-steroidal drugs on LFA-1 and ICAM-1 expression in gastric mucosa, G657

Antral excursion

- postprandial, G517

Antrum, gastric

- postprandial motor function, ultrasonic evaluation of, G517

L-Asparagine

- sodium-hydrogen exchange stimulated by, in porcine jejunal enterocytes, G828

Autonomic nervous system

- in development of vagal stimulation-induced gastric damage, G179

Bicarbonates

- modulation of intracellular secretagogue-induced chloride secretion, G929

Bile

- flow, stimulation by endothelin-1, G324

Bile acids

- secretion, stimulation by endothelin-1, G324
- sodium-dependent cotransporter from rat liver: expression and characterization in COS-7 cells, G382

Bile ducts

- effect of ligation on secretin receptor gene expression, in rat cholangiocytes, G922
- epithelial cells, cAMP-dependent mechanism activates chloride channels in, G731

Bile salts

- effect on iron and absorption, G318

Binding sites

- high-affinity, for galanin, in canine small intestine, G113

Blood circulation

- arrested, surface charge on mucosal capillary endothelium and, G685
- gastric, and antral lesion incidence in rat gastric mucosa, G1011
- gastric, big endothelin-1 and, G311
- gastric, in rats, G55
- in hepatic microcirculation, measurement of, G960

Bovine adrenal medulla docosapeptide (BAM-22P)

- adrenal secretion of, in rats with acute cholestasis, G201

Brain

- saturable binding of circulating peptide YY in, in rats, G511

Brefeldin A

- effect on lymphatic triacylglycerol transport, in rat, G292

Calcitonin gene-related peptide

- as sensory transmitter of peristalsis, G1139

Calcium

- contraction in guinea pig gallbladder smooth muscle, G469
- cytosolic, and secretagogues regulating somatostatin receptors in chief cells, G789
- intracellular, in hepatocytes, endothelin-1 effect on, G324
- intracellular, in regulation of cation channels in liver cells, G677
- in pepsinogen secretion, G613
- regulation of mucin secretion in T84 adenocarcinoma cells, G606
- requirements, for acetylcholine-induced contraction of cat esophageal circular muscle cells, G330

Calcium channels

- cytosolic, efflux activated by GTP hydrolysis in cultured gastric smooth muscle, G388
- effect of sodium nitroprusside on calcium current in opossum esophageal circular muscle cells, G1036
- influx into pancreatic acinar cells, regulation by nitric oxide production, G350

Carrier proteins

- insulin-like growth factor, and mucosal adaptation after small bowel resection, G497

Cation channels

- aldosterone-induced conductance in rat distal colon, G71
- in liver cells, G544
- regulation by intracellular calcium and protein kinase C in liver cells, G677

Cecum

- cation conductance in rabbit, G475

Cell adhesion molecule

- divalent cation regulation of enterocyte adhesion, G1099
- expression in gastric mucosa, effect of NSAIDs on, G657

Cells

- See also **Epithelial cells; Hepatocytes; Interstitial cells of Cajal; Kupffer cells; Mast cells; Parietal cells**
- colonocytes, Cl⁻ permeabilities, cAMP and phorbol ester-regulated, G846
- COS-7, expression and characterization of functional rat liver Na⁺ bile acid cotransport system in, G382
- endothelin-1 action on Ito cells, G624
- enterochromaffin-like, gastrin-type receptors, G395
- gastric, thapsigargin effect on chief cells, G613
- gastric mucosal, S-thiolation of specific proteins in, G247
- immortalized human intrahepatic biliary epithelial, regulation of intracellular pH, G1060

Cells (continued)

- pancreatic tumoral AR42J, as amphacrine model, G963
- somatostatin receptors in chief cells, G789

T84 adenocarcinoma, regulation of mucin secretion in, G606

Chloride-bicarbonate exchange

- in isolated rabbit parietal cells, G759
- sodium-dependent, G1060

Chloride channels

- cAMP-activated, in bile duct epithelial cells, G731
- somatostatin effects on, in rat colon, G1043

Chloride-chloride exchange

- in guinea pig jejunal basolateral membrane vesicles, G271

Chlorides

- rheogenic conductance, in guinea pig jejunal basolateral membrane vesicles, G271
- secretion, hepatic, G899
- secretion, secretagogue-induced, modulation by intracellular bicarbonate, G929
- transepithelial transport, somatostatin effects on, in rat colon, G1043
- transport, in primary cultures of human and rabbit colonocytes, G846
- uniport, in guinea pig jejunal basolateral membrane vesicles, G271

Cholangiocytes

- secretin receptor gene expression in, G922

Cholecystokinin

- cholecystokinin-releasing peptide: secretion and action, inhibition by somatostatin, G1156
- in guinea pig gallbladder smooth muscle contraction, G469
- in pancreas growth, G62
- regulation of pancreatic tyrosine kinase and phosphatase, G1130

Cholecystokinin octapeptide

- effect on histidine decarboxylase activity in isolated rabbit fundic mucosal cells, G395
- effect on pepsinogen secretion, G613

Cholera toxin

- G protein sensitive to, in study of galanin receptor in plasma membrane of canine small intestine muscle, G113

Cholestasis

- adrenal secretion of BAM-22P in, rats, G201

Chylomicrons

- effect of brefeldin A on, in rat, G292

Cisapride

- mechanism of action, G665

Colipase

- rat, G914

Colitis

- experimental, effects of lidocaine in, G560

Collagen IV

- enterocyte adhesion to, divalent cation regulation of, G1099

Colon

- amiloride-sensitive sodium channels, localization, G504

- nonadrenergic noncholinergic off-contractions, in cat, G40
- proximal, ion transport in, in rabbits, G1071

- slow waves, effects of methylene blue and light, in dogs, G485

- somatostatin effects on, in rats, G1043

Colonic diseases

- gastrin expression in colon cancer, G459

Computer simulations

- of esophageal transport, G525

Copper

- transport, in rodent model of Wilson's disease, G907

Cyclooxygenase

- inhibitor effects on duodenal mucosal alkaline secretion, G22
- mitogen-inducible gene, from rat intestinal cells, cloning and characterization of, G822

Cytokines

- in inflammation, in myenteric plexus, G1123

Dexamethasone

- insulin-like growth factor, and mucosal adaptation after small bowel resection, G497

Diabetes mellitus

- mouse model for insulin-dependent: signal transduction response in salivary glands of, G433

Dietary fats

- gastric emptying of, in dogs, malabsorption, G1017

1,2-Dioctanoylglycerol

- esophageal muscle cell contraction induced by, calcium requirements for, in cats, G330

Domperidone

- mechanism of action, G665

Duodenal mucosa

- alkaline secretion, effects of intraluminal hydrostatic pressure on, G22

Duodenum

- alkaline secretion, and intraluminal pressure, in rats, G22
- motility, stimulation by hyperosmolar mannitol, G940

Electrical and mechanical activity

- See also **Electrophysiology**; **Motility**; **Myoelectric activity**

- gastrointestinal, relaxation oscillator and core conductor models for understanding of, G339

Electrogastrography (EGG)

- of gastric myoelectrical activity in patients with gastroparesis, G90

Electrolytes

- effect of somatostatin on transport in rat colon, G1043

Electromyography

- of gastric myoelectrical activity in humans, G90

Electrophysiology

- of enteric neurons, G230

Endothelins

- effect on gastric smooth muscle cells, G713

Endothelin-1

- effects on gastric blood flow, G311
- hepatic sinusoidal constriction induced by, G624

- stimulation of bile acid secretion, G324

Endothelium

- surface charge, stationary red blood cells and, G685

Endotoxemia

- tissue injury: protective effect of nitric oxide, G783
- tissue injury in mice: protective effect of nitric oxide and prostaglandins, G1004

Endotoxins

- ileal mucosal hyperpermeability induced by, in pigs, G633

Enprostil

- effects on gastrin release from canine antral mucosal cells, G194

Enteric nervous system

- calcitonin gene-related peptide as sensory transmitter in, G1139
- and control of small intestinal giant migrating contractions, G576
- effect of nitric oxide synthase inhibitors on, G31
- in experimental colitis, G560
- fast synaptic transmission in, mediation by 5-HT receptors, G230
- in guinea pig, G1162
- interactions with immune system, G167
- interface with enteric immune system, G132
- role in macromolecular transport in intestine, G186
- serotonin in, analysis using anti-idiotypic antibodies to 5-HT receptors, G403

Epinephrine

- effects on ion transport in rabbit proximal colon, G1071

Epithelial cells

- Caco-2 human intestinal epithelial, uptake and regulation of riboflavine, G15
- continuous intrahepatic biliary, regulation of intracellular pH, G1060
- differentiation, in mouse gut, G987
- intestinal, monolayer culture, reversible disassembly by prolonged exposure to phorbol ester, G214
- uptake and regulation of riboflavine, G15

Epithelium

- gastric, damage induced by local ischemia-reperfusion, G263
- intestinal, cell adhesion to collagen IV in, regulatory role of local divalent cation concentrations, G1099
- intestinal, cell turnover, and sucrase-isomaltase expression, G568
- intestinal, permeability, nitric oxide and, G222
- intestinal, sodium channels in, G504
- intestinal, structure-function relationships, G214
- leaky, G722

Escherichia coli

- heat-stable enterotoxin receptor, up-regulation in regenerating rat liver, G899

Esophageal sphincter. See Esophagogastric junction**Esophagogastric junction**

- basal tone, differential signal transduction pathways in, in cats, G767
- response of lower esophageal sphincter to acetylcholine, in cats, G767

Esophagus

- See also **Gastroesophageal reflux**
 ambulatory pH monitoring, in gastro-
 esophageal reflux disease, G357
 computer stimulation of bolus transport
 in, G525
 esophageal closure reflex in cat, G147
 intraluminal multichannel pH monitor-
 ing in, G357
 nonadrenergic, noncholinergic neuro-
 transmission in, in opossum, G123

Ethanol. See **Alcohol, ethyl**

Fasting

- and refeeding: small intestinal gene ex-
 pression in rats, G83

Fats, dietary. See **Dietary fats**

Feeding

- intestinal response to, in snake, G695
 refeeding effect on intestinal sucrose-
 isomaltase expression, in preweaned
 rats, G568

Forskolin

- regulation of mucin secretion in T84 ad-
 enocarcinoma cells, G606

Free radicals

- formation by hepatocytes during postan-
 oxic reoxygenation, in rats, G451,
 G799

D-Galactosamine

- effects on hepatic and splenic TNF- α and
 MnSOD expression, G737

Galanin

- binding, in canine small intestine circu-
 lar muscle, G113
 high-affinity binding sites for, in canine
 small intestine, G106

Gastric acid

- secretion, postvagotomy, in rats, G140

Gastric emptying

- after gastric myotomy, G255
 enhancement, with prokinetic agents,
 G665
 of fat, regulation by lipolytic products, in
 dogs, G1017
 postvagotomy, in rats, G140
 study in gastroparesis, G90

Gastric mucosa

- antral lesion incidence in, relationship to
 blood flow, G1011
 damage, neural stimulation-induced,
 autonomic pathways in, G179
 damage, with local ischemia-reperfusion,
 G263
 histamine synthesis in, neurohormonal
 regulation of, G395
 injury, augmentation by mast cell activa-
 tion, G863
 LFA-1 and ICAM-1 expression in, effect
 of NSAIDs, G657
 pentagastrin-induced vasodilation in, in
 rats, G55
 polymorphonuclear neutrophil infiltra-
 tion into, G48
 stress ulcers, healing, G878
 stress ulcers, protooncogenes *c-fos* and
c-myc expression in, G878

Gastric myotomy

- gastropyloric disturbances after, G255

Gastrin

- effect on histidine decarboxylase activity
 in isolated rabbit fundic mucosal
 cells, G395

- elevation, by somatostatin immunoneu-
 tralization in suckling rats, G417
 expression in colon cancer, G459
 precursor forms, incomplete processing,
 in colon cancer, G459
 secretion, prostaglandin effects on, G194

Gastroesophageal reflux

- physiological, spatiotemporal character-
 istics of, G357

Gastrointestinal system

- electrical activities, relaxation oscillator
 and core conductor models for un-
 derstanding of, G339
 motility with nitric oxide synthase in-
 hibitors, G31
 osmoreceptor control mechanism for
 motility, G940

Gastroparesis

- myoelectrical activity in, measurement
 of, G90
 postvagotomy, in rats, G140

G-cells

- gastrin release from, prostaglandin ef-
 fects on, G194

Gene expression

- actin, in intestinal smooth muscle, in
 trichinosis, G856
 glucose-dependent insulinotropic pep-
 tide (GIP), regulation by glucose
 meal, G887
 $H^+ - K^+ - ATPase$ α -subunit, effect of his-
 tamine on, G444
 in intestinal atrophy and hyperplasia,
 G83
 manganese superoxide dismutase, in
 TNF- α toxicity, G737
 neurotensin, in ileum, age-dependent
 increase of, G706
 prolactin receptor, visualization in rat
 digestive tissues, G807
 secretin receptor, in rat cholangiocytes,
 G922

Genes

- cyclooxygenase, growth factor-inducible,
 from rat intestinal cells, G822
 salivary gland, direct in vivo adenovirus-
 mediated transfer, G1146

Genistein

- effects on pancreatic secretion, in rat,
 G303
 in study of brush-border tyrosine phos-
 phorylation, G647

Giant migrating contractions

- retrograde, G585
 small intestinal, neural control of, G576

Glottis

- response to abrupt distension of esopha-
 gus, in cats, G147

Glucagon-like peptide 1-(7-36)-amide

- parietal cell function stimulated by, in
 rats, G775

Glucose-dependent insulinotropic peptide

- gene expression, regulation by glucose
 meal, G887

Glucose meal

- effect on duodenal GIP gene expression,
 G887

Glutamine

- in proteolytic response, in rat liver,
 G118

Glutamine

- sodium-hydrogen exchange stimulated
 by, in porcine jejunal enterocytes,
 G828

Glycogenolysis

- parenchymal cell, stimulation by adeno-
 sine, G99

Growth factor

- cyclooxygenase gene inducible by, from
 rat intestinal epithelial cells, G822

Guanine nucleotides

- calcium efflux from intracellular pool
 activated by, in gastric smooth
 muscle, G388
 guanine nucleotide-binding protein
 regulation of galanin receptor affin-
 ity, in gastric smooth muscle, G839
 guanine nucleotide-binding proteins
 G_{α} , in histamine- and GLP-1-
 (7-36) amide-stimulated parietal
 cell function, G775

Guanosine 3',5'-cyclic monophosphate

- formation in pancreatic acinar cells,
 regulation by nitric oxide produc-
 tion, G350

Guanosine 5'-O-(3-thiotriphosphate)

- effect on galanin binding in canine small
 intestine, G106, G113

Guanosine triphosphate

- hydrolysis, calcium movement activated
 by, in cultured gastric smooth
 muscle, G388
 low molecular weight binding proteins,
 Rab family of, G1

Guanylate cyclase C

- binding of guanylin or ST_a to, and he-
 patic chloride secretion, G899

Hepatocytes

- adenosine triphosphate release from,
 stimulation by adenosine, G99
 free radicals and reoxygenation injury
 in, G451, G799
 ion channels in, G677, G544
 periportal and perivenular, plasma
 membrane order parameter in,
 G282
 survival during hypoxia, and inhibition
 of Na^+ / H^+ exchange, G892

Histamine

- effect on gastric $H^+ - K^+ - ATPase$ α -sub-
 unit expression, G444
 parietal cell function stimulated by, in
 rats, G775
 and pentagastrin-induced gastric muco-
 sal vasodilation, study in rats, G55
 synthesis, neurohormonal regulation of,
 in isolated rabbit fundic mucosal
 cells, G395

Histidine decarboxylase

- activity in gastric mucosa, regulation of,
 G395

Hybridization

- in situ: for identification of prolactin re-
 ceptor gene expression in rat diges-
 tive tissues, G807

Hydrogen ion concentration

- intracellular regulation, in immortalized
 human intrahepatic biliary epithe-
 lial cell lines, G1060
 intracellular regulation in isolated rabbit
 parietal cells, G759

Hydrogen ion concentration

(continued)

Hyperchloresis

secretin-induced, G922

Hypoxiahepatocyte survival during, and inhibition of Na^+/H^+ exchange, G892**Ileum**

β -lactoglobulin transport in, modulation, in rabbits, G1053
 mucosal hyperpermeability induced by endotoxin, in pigs, G633
 neurotensin expression in, age-dependent changes in, G706
 neutral NaCl absorption, stimulation by brush-border tyrosine phosphorylation, G647
 short-circuit current in, in rats, G554
 smooth muscle relaxation, nitric oxide as mediator of, in rats, G554

Immune system

interactions with enteric nervous system, G132, G167

Immunoenzyme techniques

in investigation of polymorphonuclear leukocyte infiltration, G48

Indocyanine green

pharmacokinetics, G1108
 removal kinetics after bolus injection, as liver function test, G1108

Indomethacin

effect on duodenal mucosal alkaline secretion, in rats, G22
 small bowel injury, in rats, role of leukocytes in, G239

Inflammation

intestinal, neurotransmitters and cytokines in, G1123

Inflammatory bowel disease

chemical mediators in, G560

Inositol 1,4,5-trisphosphate

secretagogue-induced production in pancreatic acini, role of tyrosine kinase in, G363

Insulin-like growth factor

gut growth induced by IGF I in rats, G1090
 IGF I and IGF II: mucosal adaptation after small bowel resection, G497
 IGF peptides: gut growth induced by, in rats, G1090

Intercellular junctionsepithelial, osmotic water flow across, in *Necturus* gallbladder, G722**Interleukin-1**

in inflammation, in myenteric plexus, G1123

Interstitial cells of Cajal

selective lesioning by methylene blue and light, effect on slow-wave activity, G485

Intestinal motility. See Gastrointestinal system**Intestine, large***See also* Colon

amiloride-sensitive sodium channels, localization, G504

Intestine, small

amiloride-sensitive sodium channels, localization, G504
 galanin binding in, in dogs, G106
 gene expression with refeeding, in rats, G83

giant migrating contractions, neural control of, G576
 indomethacin-induced injury, role of leukocytes in, G239
 microvascular permeability, in rats, G1170
 resection, mucosal adaptation after, inhibition by dexamethasone, G497

Intestines*See also* Jejunum

growth, effect of IGF peptides on, in rats, G1090
 growth and differentiation, in rats, G83
 inflammation, neurotransmitters and cytokines in, G1123
 rapid upregulation in response to feeding, in snake, G695

Ion channels

in liver cells, G544, G677

Ions

hepatocellular uptake of organic ions, G425

Ion transport

intestinal, neuroimmune signaling in regulation of, G167
 in proximal colon, G1071
 in rabbit cecum, G475

Iron

absorption, bile salts and, G318

Ischemia-reperfusion injury. See Reperfusion injury**Jejunum**

amiloride-sensitive sodium channels, localization, G504
 chloride transport in, in guinea pig, G271
 macromolecular transport in rat jejunum, G186
 mucosa oxygenation, oscillations in, G978

Kupffer cells

eicosanoid release from, and glycogenolysis in parenchymal cells, G99

 β -Lactoglobulin

transport, in ileum, modulation in rabbits, G1053

Laser-Doppler flowmetry

in hepatic perfusion, G960
 in measurement of gastric mucosal vasodilation in rats, G55

Lectins

in study of mouse gut epithelial cell differentiation, G987

Leucine

in regulation of liver proteolytic response, G118

Leukocytes

adhesion in gastric mucosa, NSAIDs and, G657
 in indomethacin-induced small bowel injury, in rats, G239
 polymorphonuclear: in gastric ischemia-reperfusion injury, G48

Leukotrienes

and gastric mucosal susceptibility to injury, G863

Lidocaine

effects in experimental colitis, G560

Lipase

gastric, human, G372
 gene family, G914

pancreatic, in rats, G914

Lipid peroxidation

and reoxygenation injury in isolated rat hepatocytes, G799

Lipids*See also* Dietary fats

emulsification, in human stomach, G372
 lymphatic transport, effect of brefeldin A on, in rat, G292

Lipolysis

in human stomach, G372

Lipolytic products

modulation of gastric emptying of fats, in dogs, G1017

Lipopolysaccharides

effects on hepatic and splenic TNF- α and MnSOD expression, G737
 hepatic injury, protection against, synergistic effects of nitric oxide and prostaglandins in, G1004
 ileal mucosal hyperpermeability induced by, in pigs, G633

Lipoproteins

effect of brefeldin A on, in rat, G292

Liver

in clearance of surfactant-like particle proteins, in rats, G596
 macroautophagy and proteolytic function, endocrine and amino acid regulation of, G118
 microcirculation, measurement of blood flow in, G960
 microcirculation, response to endothelin-1, G624

Liver cells. See Hepatocytes**Liver function tests**

indocyanine green decay after bolus injection as, G1108

Lymphocyte function associated antigen 1

expression in gastric mucosa, effect of NSAIDs on, G657

Macromolecular systems

uptake in intestine, G186

Manganesesuperoxide dismutase expression, in TNF- α toxicity, G737**Mast cells**

activation, and gastric mucosal susceptibility to injury, G863

Meclofenamate

effect on duodenal mucosal alkaline secretion, in rats, G22

N-Methyl-D-aspartate

effect on dorsal motor nucleus of vagus, nitric oxide as mediator of, G154

Metoclopramide

mechanism of action, G665

Microcirculation

chloride transport by intestinal basolateral membrane vesicles, G271

Models

parallel tube model for assessment of vasopermeability, G1170
 well-stirred model for assessment of vasopermeability, G1170

Models, mathematical

of esophageal transport, G525

Motility*See also* Gastrointestinal system

antral, ultrasonic evaluation of, G517
 duodenal, stimulation by hyperosmolar mannitol, G940

- duodenal, with increased alkaline secretion, G22
- gastric, after gastric myotomy, G255
- gastric, effect of TRH and SP in nucleus raphe obscurus of rats, G870
- intestinal, neural control of, G576
- Mucins**
- secretion, regulation in T84 adenocarcinoma cells, G606
- Mucous membrane**
- alkaline secretion, effects, G22
- Muscle, smooth**
- gastric, calcium efflux from intracellular pool activated by GTP hydrolysis in, G388
- gastric, contraction, G713
- gastric, endothelin receptors on, G713
- gastric, relaxation, galanin receptors as mediators of, G839
- gastric, VIP-stimulated nitric oxide synthase activity in, G161
- guinea pig gallbladder, myosin light-chain phosphorylation and contraction of, G469
- ileal, relaxation, nitric oxide as mediator of, in rats, G554
- intestinal, in *Trichinella spiralis* infection, G856
- Muscle contraction**
- esophageal acetylcholine-induced, calcium requirements for, G330
- Myenteric plexus**
- norepinephrine release from, tumor necrosis factor- α suppression of, G1123
- serotonin in, analysis using anti-idiotypic antibodies to 5-HT receptors, G403
- Myoelectric activity**
- migrating myoelectric and rhythmic oscillating complexes, in chickens, G585
- in patients with gastroparesis, G90
- Myosin light chains**
- phosphorylation, in guinea pig gallbladder smooth muscle contraction, G469
- Na⁺-K⁺-ATPase**
- sodium-independent ouabain-sensitive, G1083
- Neurons**
- nonadrenergic, noncholinergic, G123
- nonadrenergic, noncholinergic off-contractions in cat colon, G40
- Neurotensin**
- expression in ileum, age-dependent increase of, G706
- Neutralization tests**
- immunoneutralization: somatostatin, effect on gastrin levels in suckling rats, G417
- Nitric oxide**
- effects on motoneurons in dorsal motor nucleus of vagus, in rats, G154
- in esophageal peristalsis, G123
- in nonadrenergic, noncholinergic neurotransmission in opossum esophagus, G123
- involvement in NANC off-contractions in cat colon, G40
- in muscle relaxation, in rat ileum, G554
- in neurally induced pancreatic exocrine secretion, in pigs, G206
- production, regulation of cGMP formation and calcium influx in pancreatic acinar cells, G350
- protective effect against tissue injury in endotoxemia, G783, G1004
- surface charge on mucosal capillary endothelium and, G685
- synthesis, inhibition, effect on intestinal epithelial permeability, G222
- synthesis, inhibition, effect on superoxide release by perfused liver, G783
- Nitric oxide synthase**
- inhibition, by protein kinase C, in dispersed gastric muscle cells, G161
- inhibition, effect on superoxide anion formation, in liver, G783
- inhibitors, effect on intestinal motility and enteric nerves, G31
- N^G-Nitro-L-arginine**
- effect on intestinal permeability, G222
- Nonsteroidal anti-inflammatory agents (NSAID). See Anti-inflammatory agents**
- Norepinephrine**
- as inhibitory neurotransmitter in sphincter of Oddi ganglia, G1162
- release from myenteric plexus, tumor necrosis factor- α suppression of, G1123
- Nucleus raphe obscurus**
- microinjection of thyrotropin-releasing hormone and substance P into, effect on gastric motor activity, in rat, G870
- Omeprazole**
- effects on parietal cells, G745
- Oncogenes**
- expression during fasting and refeeding, in rats, G83
- Opioids**
- endogenous, adrenal secretion of, in cholestasis, G201
- Osmoreceptors**
- local, in regulation of gastrointestinal motility, G940
- Oxygen**
- oscillations in cell oxygenation in jejunal mucosa, G978
- reoxygenation injury in hepatocytes, G451, G799
- sensor mechanism, hepatic, G953
- uptake, due to arachidonic acid, in perfused liver, G953
- Pancreas**
- enzyme synthesis and turnover in humans, G816
- exocrine, in humans, G816
- growth, and high-affinity receptor occupation, G62
- neurally induced exocrine secretion in pigs, role of nitric oxide in, G206
- nitric oxide, cGMP, and calcium influx in, G350
- pancreatic lipase-related protein, rat, G914
- secretion, genistein effects on, in rat, G303
- Paraventricular hypothalamic nucleus**
- stimulation, gastric mucosal damage induced by, G179
- Parietal cells**
- isolated, intracellular pH regulation in, in rabbits, role of sodium-bicarbonate cotransporter in, G759
- isolated, stimulation by histamine and GLP-1-(7-36) amide, G775
- omeprazole effects on, G745
- Patch-clamp technique**
- measurement of membrane ion currents, in liver cells, G544
- Pentagastrin**
- gastric mucosal vasodilation induced by, in rats, G55
- Pepsinogen**
- secretion, G613
- Peptic ulcer**
- protooncogenes *c-fos* and *c-myc* expression in, G878
- Peptides**
- saturable binding of peptide YY, in dorsal vagal complex of rats, G511
- Periodicity**
- rhythmic oscillating complexes in chickens, G585
- Peristalsis**
- calcitonin gene-related peptide as sensory transmitter of, G1139
- role of NO in esophageal, G123
- Permeability**
- parallel tube model for assessment of vasopermeability, G1170
- vasopermeability in rat small intestinal, G1170
- Pertussis toxins**
- G protein sensitive to, in study of galanin receptors in canine small intestine, G106
- pH. See Hydrogen ion concentration**
- Pharynx**
- pharyngeal clearance during swallowing, aging, G972
- Phorbol esters**
- prolonged exposure to, reversible disassembly of intestinal epithelial monolayer by, G214
- Phospholipases**
- activation of C form, and lower esophageal sphincter tone, G767
- activity of D form in pancreas of rats, G62
- regulation of, G363
- Phosphoramidon**
- effect on big endothelin-1-induced vasoconstriction, in canine stomach, G311
- Phosphotyrosine phosphatase**
- pancreatic, regulation by cholecystokinin and somatostatin, G1130
- Platelet-activating factor**
- PAF-acetylhydrolase absorption by rat intestine, G935
- Potassium**
- absorption, G1083
- Potassium channels**
- calcium-activated currents, G1036
- in liver cells, G544
- in rat distal colon, G71
- transport, in isolated guinea pig colonocytes, G1083
- Potassium-hydrogen ion pump, G1083**
- Pressure**
- intraluminal, effect on duodenal alkaline secretion, G22
- Prokinetic agents**
- mechanism of action, G665

Prostaglandins

- effects on gastrin release from canine antral mucosal cells, G194
- in glycogenolysis in parenchymal cells, G99
- involvement in NANC off-contractions in cat colon, G40
- prostaglandin D₂ effect on submucosal neurons in guinea pig colon, G132
- protective effect against tissue injury in endotoxemia, G783, G1004

Protamines

- effect on osmotic water flow across epithelial tight junctions, G722

Protein kinase C

- effect on intestinal epithelial monolayer phenotype, G214
- inhibition of nitric oxide synthase in dispersed gastric muscle cells, G161
- intracellular, in regulation of cation channels in liver cells, G677
- in regulation of mucin secretion in T84 adenocarcinoma cells, G606

Proteins

See also **Carrier proteins**; **Lipoproteins**

- absorption, G1053
- Arf, G1
- low molecular weight GTP-binding, G1
- Rab, Rac, Ral, Rap, Ras, and Rho, G1
- regulation by endocrines and amino acids of degradation in liver, G118
- role of low molecular weight GTP-binding proteins in secretion, G1
- surfactant-like particle, clearance, in rats, G596

Protooncogenes

- c-fos*, expression in gastric mucosal stress ulcers, G878
- c-myc*, expression in gastric mucosal stress ulcers, G878

Pyrimidine

- effects in pentagastrin-stimulated gastric mucosa, of rats, G55

Radionuclide imaging

- of oral-pharyngeal transit during swallowing, aging and, G972

Ranitidine

- effect on gastric acid secretion of pentagastrin-stimulated rats, G55

Receptors, adrenergic

- β -adrenergic receptor downregulation, and signal transduction response in salivary glands of nonobese diabetic mice, G433

Receptors, aldosterone

- in rat distal colon, G71

Receptors, cholecystokinin

- high-affinity, occupation of, and pancreas growth, G62

Receptors, endothelin

- on gastric smooth muscle cells, G713

Receptors, galanin

- in canine small intestinal circular muscle synaptosomes, G106
- in gastric smooth muscle, role in muscle relaxation, G839

Receptors, histamine H₂

- activation, stimulation of H⁺-K⁺-ATPase α -subunit expression, G444

Receptors, prolactin

- short and long forms, gene expression in rat digestive tissues, G807

Receptors, secretin

- gene expression, upregulation in rat cholangiocytes after bile duct ligation, G922

Receptors, serotonin

- enteric, G230
- enteric anti-idiotypic antibodies for, G403

Receptors, somatostatin

- in chief cells, G789

Recording

- intracellular recording from submucosal neurons, measuring effect of prostaglandin D₂ in guinea pig colon, G132

Reperfusion injury

- in gastric antral mucosa, relationship to blood flow, G1011
- of gastric epithelium, with or without exogenous acid, G263
- in gastric mucosa, G48

Riboflavin

- epithelial cell uptake and regulation of, G15

Salivary glands

- direct in vivo adenovirus-mediated gene transfer to, G1146
- signal transduction response, in non-obese diabetic mice, G433

Scintigraphy. See Radionuclide imaging**Second messenger systems**

- and lower esophageal sphincter tone, G767
- in parenchymal cells, and glycogenolytic effect of adenosine, G99

Secretin

- activation of chloride channels, through cAMP-dependent mechanism, G731
- stimulation of pepsinogen secretion, G613

Serotonin

- role in enteric nervous system, G403

Serum albumin, bovine

- transport across rat jejunum, G186

Slow waves

- generation, role of interstitial cells of Cajal in, G485

Sodium

- absorption, in rabbit cecum, G475
- effects on ion transport in rabbit proximal colon, G1071

Sodium channels

- in intestinal epithelia, G504

Sodium-hydrogen exchange

- brush-border, G647
- inhibition, and hepatocyte survival during hypoxia, G892
- in isolated rabbit parietal cells, G759
- stimulated by L-glutamine and L-asparagine, in porcine jejunal enterocytes, G828

Sodium nitroprusside

- effect on Ca²⁺ currents, in opossum esophageal circular muscle cells, G1036
- inhibition of endothelin-1 action on hepatic sinusoids, G624

Somatostatin

- effects in rat colon, G1043
- inhibition of cholecystokinin release, G1156

- murine monoclonal antibody, increased gastrin induced by, in suckling rats, G417

- in regulation of pancreatic tyrosine kinase and phosphotyrosine phosphatase, G1130

Sphincter of Oddi

- sympathetic input to, in guinea pig, G1162

Starvation

- effect on intestinal sucrase-isomaltase expression, in preweaned rats, G568

Stomach

See also **Gastric mucosa**

- big-endothelin-1-induced vasoconstriction, in dogs, G311
- corpora-antralpyloric coordination of motility and gastric emptying, G255
- emulsions and lipolysis of dietary lipids in, G372
- myoelectrical activity, in patients with gastroparesis, G90

Stress

- oxidative stress: induction of S-thiolation of proteins in gastric mucosal cells, G247

Submucous plexus

- in guinea pig colon, G132

Substance P

- microinjection into nucleus raphe obscurus of rat, effect on gastric motor activity, G870

Sucrase-isomaltase complex

- expression, effects of starvation and refeeding, in preweaned rats, G568

Sulfhydryl compounds

- S-thiolation of proteins in gastric mucosal cells, induction by oxidative stress, G247

Sulfobromophthalein

- hepatocyte uptake of, at physiological albumin concentration, G425

Superoxides

- anion release by perfused liver, enhancement by inhibition of nitric oxide formation in vivo, G783

Surface-active agents

- surfactant-like particle protein clearance in rats, G596
- surfactant-like particles, rat intestinal, secretion and distribution after fat feeding, G944

Swallowing

- effect in aging, G972

Taurocholate

- effect on iron absorption, G318
- hepatocyte uptake of, at physiological albumin concentration, G425
- uptake, in COS-7 cells transfected with cDNA for rat liver Na⁺ bile acid co-transport system, G382

Thapsigargin

- effect on pepsinogen secretion, G613

Thyrotropin-releasing hormone

- microinjection into nucleus raphe obscurus of rat, effect on gastric motor activity, G870

Tight junctions. See Intercellular junctions**Trichinella spiralis**

- effect on intestinal smooth muscle, G856

Triglycerides

triacylglycerol, lymphatic transport, effect of brefeldin A on, in rat, G292

1-[4-(Trimethylamino)phenyl]-6-phenylhexa-1,3,5-triene

as probe for plasma membrane order parameter study in hepatocytes, G282

Tumor necrosis factor

TNF- α effects on MnSOD in vivo, G737

TNF- α suppression of norepinephrine release from myenteric plexus, G1123

Tyrosine kinase

brush-border, in short-term signal transduction in intestinal epithelial cells, G647

pancreatic, regulation by cholecystokinin and somatostatin, G1130

in secretagogue-induced production of inositol 1,4,5-trisphosphate in pancreatic acini, G363

Tyrphostins

inhibition of secretagogue-induced 1,4,5-IP₃ production and amylase release in pancreatic acini, G363

Ultrasound

evaluation of human postprandial antral motor function, G517

Vagoplasty

microsurgical, regeneration of rat abdominal vagal nerves after, G140

Vagorraphy

regenerative potential after, in rats, G140

Vagotomy

truncal: vagal regenerative potential after, in rats, G140

Vagus nerve

dorsal motor nucleus, nitric oxide-mediated excitatory effect on, G154

pancreatic secretion induced by, role of nitric oxide in, G206

regenerative potential, in rats, G140

stimulation, gastric damage induced by, G179

Vasoactive intestinal peptide

relation to nitric oxide-related compounds, G31

Vasomotor system

effect on jejunal mucosal tissue oxygenation, G978

Vesicular transport

role of low molecular weight GTP-binding proteins in, G1

Vocal cords

See also Glottis

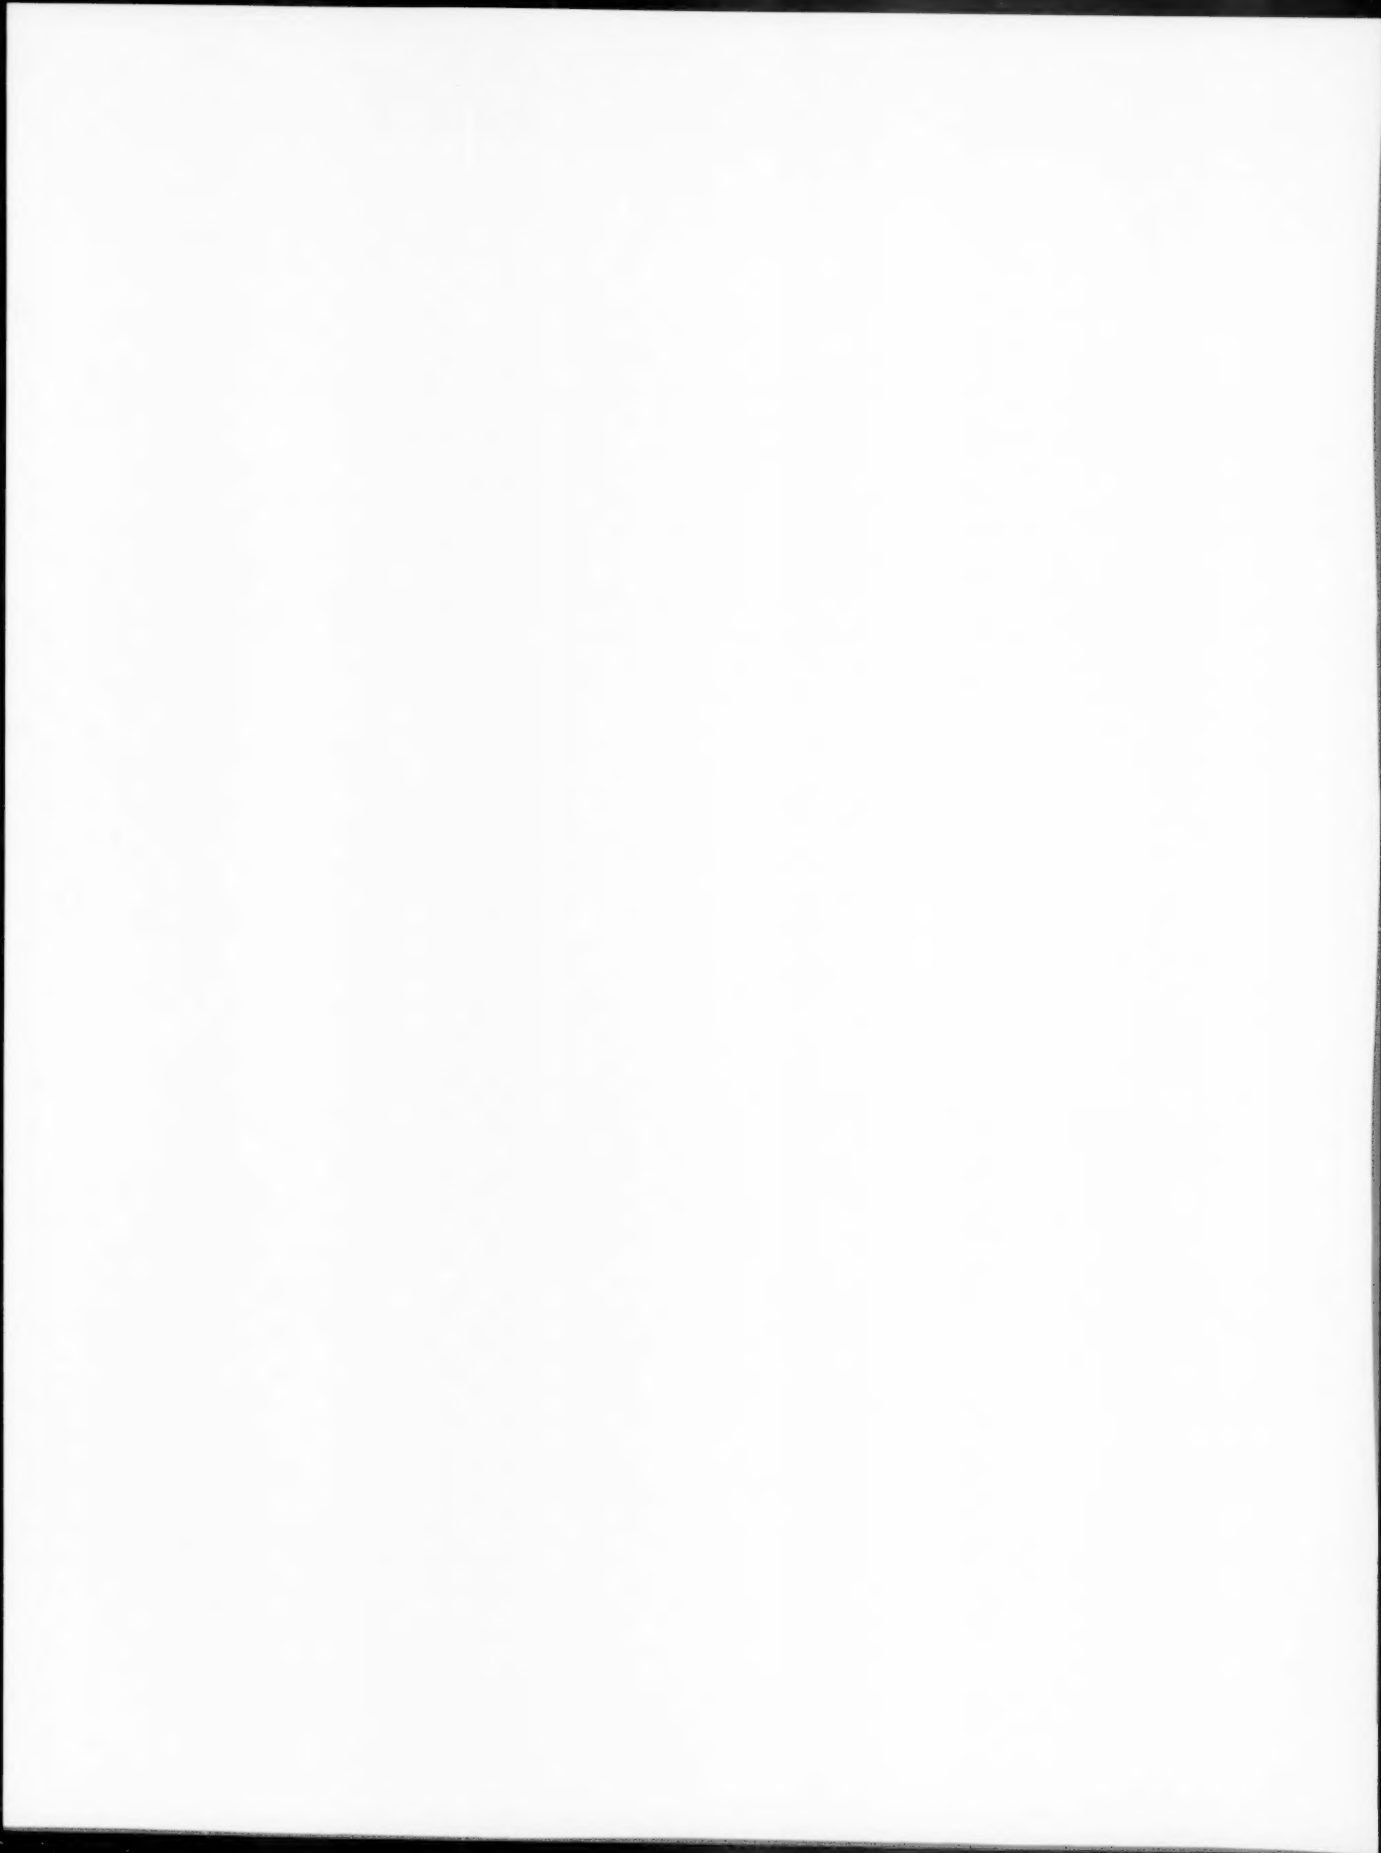

response to abrupt distension of esophagus, in cats, G147

Water

osmotic flow across epithelial tight junctions, in *Necturus* gallbladder, G722

Wilson's disease

pleiotropic effect of LEC mutation in, in rat model, G907
